2027 Blue Cross and Blue Shield Service Benefit Plan
FEP Blue Standard and FEP Blue Basic
Section 5(f)(a). FEP Medicare Prescription Drug Program

- **Generic equivalents**

Generic equivalent drugs have the same active ingredients as their brand-name equivalents. By filling your prescriptions (or those of family members covered by the Plan) at a pharmacy participating in our network, you authorize the pharmacist to substitute any available U.S. FDA-approved generic equivalent, unless you or your physician specifically requests a brand-name drug and indicates "dispense as written." See Section 10, *Definitions*, for more information about generic alternatives and generic equivalents.
